

How to prepare your paper for publishing in IEEE Xplore:

STEP 1: Complete a properly formatted paper document.

(Please follow strictly the given [ICISE 2016 template](#)  specially the header and footer of the first page of your paper. Do not insert page number in your paper)

STEP 2: Generate your PDF file using IEEE PDF eXpress™

The paper must be submitted in Adobe's Portable Document Format (PDF). The PDF file must pass the compatibility test in the IEEE PDF eXpress™. Your paper cannot be included in the proceedings if it fails the compatibility test. IEEE PDF eXpress™ allows you to convert your Word, LaTeX, or range of other source files into IEEE Xplore™ compatible files (preferred option). You may also use PDF eXpress to check your own PDF files for compatibility

2.1. After creating your final paper using the given ICISE 2016 Paper Template go to the IEEE PDF eXpress website at <http://www.pdf-express.org/>

2.2. Click on 'New User' option to create your own IEEE PDF eXpress account.

Conference ID : 39262X

2.3. Upload source file(s) for Conversion and/or PDF(s) for checking. The site contains extensive instructions, resources, helpful hints, and access to technical support.

2.4. Proofread the PDF file generated thoroughly. There could be missing symbols, equations, graphs and also errors reported. Please re-prepare the source file and repeat the conversion again. If problem persists, please use the online help provided in the PDF eXpress site.

STEP 3: Send your final paper (Source file and PDF file) to icise2016@um.ac.ir

(Put your paper ID in the subject of your email)
